Waste and recycling services are an important part of the overall health and well-being of the communities we serve and we will be working during this challenging time. There is no higher priority to our entire Homewood Disposal family than the safety of our employees, customers and communities we serve. In response to the latest coronavirus (COVID-19) information, we are taking steps to help prevent the spread of the virus.

**CHANGE**

- Homewood Disposal Service is **NOT** suspending the collection of bulk items at this time. But, as a courtesy to your driver, please delay disposing of bulk items and additional garbage placed outside of your cart or refuse container. We are asking residents to only place garbage generated during the week in their refuse cart or container.

**NO CHANGE**

- At this time, there are no significant changes to the collection of your household waste.

- Your pick up day remains the same. Pick up times may vary. Please have material at the curb on your regular pick up day by 6 am to avoid a missed pick up.

- Please bag all waste that goes into your waste cart/bin.

- There is no change to your recycling collections. Please remember to place recyclables within their designated recycling cart/bin and **NOT** within plastic bags.

- Yard waste season begins April 1st.

Please understand that there may be further changes to your curbside solid waste services as the COVID-19 pandemic impacts our company over the coming days/weeks. Please visit www.mydisposal.com for service updates.
